Linkedin.com/in/godlove-tanyi-mofa

Github.com/mofapeace

Skills

Linux and windows fundamental.

Network Design with packet tracer and GNS3

Basic IOT Programming

Graphics and designing.

Web development, UI/UX with figma

Python in networking, mininet

Web penetration testing

Social engineering.

Reconnaissance from OSINT

Tools

Nmap

Wireshark

Burp suite

Wireless Network Tools

Packet Tracer.

Arduino IDE

Google Ducker

GNS3

Education

Currently undergraduate

- Updated The previous using React js and Tailwind css (present)

FIREWALL

Currently

- Currently establishing a Firewall using python and Rasbery pie, After I will gain skills in IOT

NETWATCH

Currently

Establishing A project to Monitor the Entire Cameroon Network. Checking Bandwidth, Jitter, Download speed and upload speed for each ISP in Cameroon and Satellite Networks. Report to the public and advise on what network to use at a particular moment. Later on, develop an Ai to predict Network statistics in near future.

Currently at my second year in College (Engineering)

GCE Advance level

GCE Ordinary Level

Hobbies

Basketball, DJing, Gaming, Checkers.

Others

Introduction to Cyber Security by Cisco

Ethical Hacking by Cisco

Hobbies

Basketball, DJing, Gaming
